

Tunnel Vision
Environmental Policy

Document No: TV-HSE-P-002
Version No: 5
Issue Date: May 2023
Page No: Page 1 of 1

Tunnel Vision is committed to undertaking its activities in an environmentally responsible manner and effectively managing any risk that may impact the environment in line with ISO 14001.

Tunnel Vision will manage its work activities in a manner that is consistent with the principles of ecologically sustainable development and will deliver continuous improvement in environmental performance.

Tunnel Vision will take all steps necessary to ensure that its activities do not compromise this commitment. We will comply with all legislative requirements and are committed to enhancing environmental performance through the continual improvement of our environmental management system,

This Environmental Policy receives the highest priority from the senior managers of the organisation and this priority is communicated to all people connected with the company. Tunnel Vision is committed to the protection of the environment, including the prevention of pollution. We seek to use the most environmentally responsible products available.

Managers and the Operations Manager are responsible, within their work areas to implement this policy. They must proactively address issues that may affect environmental performance at worksites for which the Tunnel Vision is responsible.

All Tunnel Vision workers have a responsibility to actively contribute towards avoiding or minimising environmental impacts in their day to day activities. Workers must monitor the continued effective installation and operation of environmental controls within the scope of their day to day work.

All incidents, however minor, are reported to management so that appropriate action can be undertaken to prevent a repetition or to minimise the risk.

Tunnel Vision will reduce and recycle waste materials where possible and dispose of other waste material in a responsible manner.

Tunnel Vision consults with its workers, contractors and clients on environmental matters especially where any workplace change of practice may impact the environment or their obligations.
